

MOAB BIT & TOOL Co, INC.

Doing business for over 60 years.

THE NEW MOAB FASTCLAW

- Aggressive yet durable design for blasthole and other demanding applications where higher penetration rates are crucial.
- Designed using 3D Solid Modeling software and CNC machined for exact cutter placement.
- Heavy Duty replaceable Kenametal cutters for easy field replacement.
- Open center design and large junk slots for maximum air flow and cuttings evacuation.
- Heavy Duty wear protection on all gage contact surfaces for maximum bit life.
- Built to perform in demanding applications at a lower cost than the competition.
- Call us today to discuss your specific size needs or to set up a test run!
